## STARTING OR STARTING / CYCLE SERVICE

### Keep the Fleet Running with Starting & Cycling Service Solutions

Many heavy-duty fleet truck or equipment applications require a high-powered battery to crank larger engines. An increasing amount of these applications also demand more accessory power from multiple electrical loads such as lights, communication, refrigeration, and other electrical-draining devices. This complete line of commercial-grade batteries is specially engineered to provide maximum power, performance, stamina, and durability to the industry's most demanding applications.

## STARTING AND CYCLE SERVICE BATTERIES

### Electrical Short Prevention System

Protects power-producing components from life-robbing electrical shorts

### Rugged vibration resistant construction\*

Reinforced internal design withstands heavy-duty use

### Maintenance-free designs

Maximizes convenience, minimizes water loss for extended operation

### Anchor-locked element and tight-packed construction

Resist demands of grueling daily use and off-road conditions

### Commercial-tough polypropylene case and cover

Resist breakage to protect equipment and extend service life

## ADDED FEATURES OF CYCLE SERVICE BATTERIES

### Separator insulated fiberglass mats

Reinforce plate to better withstand demanding cycling service

### High density oxide

Holds more reserve power for accessory equipment
