COMMERCIAL

STARTING OR STARTING / CYCLE SERVICE

Keep the Fleet Running with Starting & Cycling Service Solutions

Many heavy-duty fleet truck or equipment applications require a high-powered battery to crank larger engines. An increasing amount of these applications also demand more accessory power from multiple electrical loads such as lights, communication, refrigeration, and other electrical-draining devices. This complete line of commercial-grade batteries is specially engineered to provide maximum power, performance, stamina, and durability to the industry's most demanding applications.

Part #	Description	Price:
1131PMF	Series 31 Post Mount 950 CCA (Exchange*)	\$129.99
1131MF	Series 31 Stud Mount 950 CCA (Exchange*)	\$129.99
665MF	Series 65 Post Mount 850 CCA (Exchange*)	\$123.99

STARTING AND CYCLE SERVICE BATTERIES

Electrical Short Prevention System

Protects power-producing components from life-robbing electrical shorts

Rugged vibration resistant construction*

Reinforced internal design withstands heavy-duty use

Maintenance-free designs

Maximizes convenience, minimizes water loss for extended operation

Anchor-locked element and tight-packed construction

Resist demands of grueling daily use and off-road conditions

Commercial-tough polypropylene case and cover

Resist breakage to protect equipment and extend service life

ADDED FEATURES OF CYCLE SERVICE BATTERIES

Separator insulated fiberglass mats

Reinforce plate to better withstand demanding cycling service

High density oxide

Holds more reserve power for accessory equipment

Due to market conditions relating to COVID-19, all prices are subject to change without notice.

AIR DISC BRAKE COMPONENTS

Dayton is a brand you know and trust, with comprehensive coverage for all major air disc brake systems, including:

CALIPERS

All new, not re-manufactured – featuring Hendrickson, SAF Holland, Wabco (ZF™ Group), and Dayton-manufactured direct replacements for Bendix and Meritor.

ROTORS

Our complete line of rotors offers proven quality that meets ISO 26866 Indicative Wear Testing standards, FMVSS 121 requirements, and ECE R90 test criteria engineered for long service life and trouble-free installation.

BRAKE PADS

Three distinct FMVSS-211-tested brake pads engineered to deliver the exact braking performance you need.

All pads meet ISO 26866 Indicative Wear Testing standards, FMVSS 121 requirements, and ECE R90 test criteria.

- Fras-Le GTD Pads – replacements designed to match the fit, function and performance of the original equipment
- Dayton 29CV Pads - premium grade aftermarket
- Dayton 23VL Pads - value-priced, high quality

CHAMBERS

Every Dayton Parts brand chamber includes:

- A crimped cap for the parking brake
- Corrosion-resistant finish on mounting housing and spring brake cap
- Service and parking brake diaphragms reinforced with nylon cord
- Inlet ports are conveniently marked with “Parking” and “Service”
- Combo chambers bear the size and stroke cast into the center housing; piston chambers have the size etched into the spring brake cap above the inlet ports
