Freightliner
2008-2019
M2 & M2-112V
Cummins ISB

KYSOR-STYLE FAN CLUTCHES

NEW

Over 5,000 inch-pounds of Torque!

REPLACES
HORTON® 991455,
981455, 99A9649

Kit Includes 3282
Solenoid Valve

OURS LOOKS DIFFERENT BECAUSE IT IS DIFFERENT.

Direct replacement/upgrade for Horton® 991455 Fan Clutches

The superior design of the 8055NKIT makes for easier and more affordable long-term maintenance. Converting your fan clutch upgrades it from a medium duty fan clutch to a heavy duty fan clutch. Our model is capable of handling a larger fan and will last longer than the competition.

Included with this kit is our 3-way Solenoid Valve NO-NC 125NPTF, 12VDC, Part #3282.

EnduraSure® Spring Brake

You rely on your spring brakes to stop and park your vehicles with confidence, every time. But when contaminants enter the chamber, corrosion sets in and leads to broken springs – the number one failure mode for spring brakes. Thanks to its innovative design, EnduraSure offers unmatched durability. In fact, in corrosion testing, EnduraSure even outperformed some “premium” spring brakes offered in the marketplace.

Furthermore, recent design improvements to the power spring, service diaphragm and diaphragm retention make an already proven product even more robust to provide longer service life and help lower your total cost of ownership (TCO).

The EnduraSure advantage:

- Up to 3x the power spring life of competitors and even previous Bendix spring brakes
- Bendix® No Touch™ Power Spring increases height between coils by 33% vs. typical T30/30 spring brake, helps prevent coil clash and corrosion
- Epoxy coated power spring enhances corrosion protection
- Lightest weight chamber in its class
- 4-year standard warranty*

COMMON MID-SHIP COMPONENTS

(found on the back of this page)

Part# 6-0350

IN-SHOP, OE-STYLE, PRESS-FIT DESIGN

Designed, Engineered and Manufactured to meet or exceed OE Performance Specifications.

- **HOT FORGED CROSS** heat treated to proprietary levels to provide optimal strength and endurance for the intended, specific application.
- **PRECISION GROUND JOURNALS** provide exceptional strength, durability and load distribution to extend life.
- **PREMIUM SEALING SYSTEM** with needle bearing retainer to keep lube in and environmental contaminants out, while holding needle bearings in optimal position for peak performance and extended life of the joint.
- **PRECISION ENGINEERED, EXTENDED LENGTH NEEDLE BEARINGS** that enhance load distribution and durability for extended life.
- **GLASS IMPREGNATED NYLON THRUST WASHER** eliminates metal to metal contact between the bearings and the cap, to minimize heat and maximize life.
- **PRECISION GROUND BEARING CAP OD** for exact OE press-fit into the yoke.
- **OE-STYLE SNAP RING RETENTION SYSTEM** holds the bearing caps in optimal position for peak performance.
- **FLEXIBLE GREASING** improved Y-Zerk grease fitting with dual lubrication points for simultaneous greasing, compared to single headed zerk.

HEAVY-DUTY

STEERING COMPONENTS

TURN TO DAYTON TO KEEP YOUR FLEET ROLLING

Stop paying dealer prices or settling for questionable product quality and unpredictable inventory. Dayton has the most complete line of quality steering components for heavy duty trucks in the aftermarket. From king pins to tie rod ends, we're ready to ship from multiple U.S. locations to get you the parts you need to keep productivity up and fleet maintenance costs down.

COUNT ON DAYTON INNOVATION AND QUALITY

- **King pin sets and repair kits** - including conventional ream-to-fit bi-metal style, plastic composite, and hassle-free spiral bushing design that installs without reaming
- **Remanufactured steering gears**
- **Drag links, cross tube assemblies, and tie rod ends** - designed to match the fit and performance of the original equipment
- **Power steering pumps** - designed to match the fit and function of the original pump on specified applications, and are engineered for reliable performance and durability

WHEEL END

NO TORQUE WRENCH REQUIRED.

STEMCO is changing the game on wheel ends again! With the Auto-Torq axle fastener, **installation has never been easier.** Auto-Torq sets the wheel end in optimum bearing adjustment for maximum life.

EASY INSTALLATION

Auto-Torq technology takes the guesswork out of axle fastener installation by eliminating complex processes and specialty tools required with current market axle fasteners.

MAXIMIZES BEARING LIFE

By applying the optimum clamp load on the bearings every time, bearing wear is minimized, resulting in the longest bearing service life.

ALL-IN-ONE SOLUTION

Let Auto-Torq do the work. Throw away those costly spacers, half-stand bearings and precision hubs necessary for "PreSet" systems. Auto-Torq is compatible with any industry hub manufacturer. Combine with STEMCO industry-leading seals, bearings and hubcaps for extended warranties on your wheel ends.

SPEEDS WORKFLOW

By eliminating the need for complex and repetitive steps, Auto-Torq allows for a quicker install time with improved peace of mind that installation is done correctly.

OPTIMAL WHEEL BEARING ADJUSTMENT

Designed with an internal mechanism for optimal wheel bearing adjustment according to Society of Automotive Engineers (SAE) Recommended Practice J2535 for Wheel Bearing Adjustment and Optimal Bearing Life.

PREVENTS BACKOFF WITH EASY REMOVAL

Integrated locking mechanism prevents backoff while still allowing for easy removal for annual inspections and maintenance.

OFFERS PEACE OF MIND

With no clips, washers, keepers, snap rings or screws involved, you can rest assured that installation is performed correctly. The Auto-Torq eliminates most variables and sets optimum bearing adjustment AUTOMATICALLY.

Combine Auto-Torq with Any STEMCO Seal for Maximum Impact, or Use It by Itself to Bring the Benefits of Pre-Load into Any Wheel End

CHELSEA® Z15 SERIES

PTO for MY2025+ Ram TorqueFlite® HD Series

The Z15 Series PTO from Parker Chelsea is engineered for the next generation of vocational vehicles. Built for MY2025 Ram Heavy Duty trucks mated to the ZF PowerLine™ 8-speed TorqueFlite® HD automatic transmission, this live-drive, hydraulically shifted unit delivers high performance in a compact package. Featuring pressure-lubricated internals and multiple pump-mount options, the Z15 is ideal for space-constrained vocational upfits while delivering rugged durability and reliable, continuous power for the most demanding applications.

Z15 Series

Applications:

- Aerial
- Tow and Recovery
- Light Dump Truck
- Snow and Ice
- Service Truck
- Water Drilling

Product Features and Benefits:

- Compact Footprint.
- LiveDrive Capability.
- Pressure Lubrication.
- Remote Hydraulic Shifting.
- SmartStart Option for High-Torque Start-up.

Z15 Series Power Take-Off – Ram TorqueFlite® HD

Specifications & Pump Options – For PTO output information see application catalog

Transmission Mounting Side	Flange Type	Shaft Type	Pump Rotation	Ratio	Continuous Maximum Speed
Z15 - Left Hand	SAE A	(3/4" - 11T) (7/8" - 11T)	CW	150% Engine	2500 RPM

NOTE: Higher speed output requirements require individual Application Approval.

REINVENTING THE WHEEL END®

UNITIZED REV-PINION SEVERE-DUTY SEALS

REV-PINION UNITIZED SEALS FEATURE:

- Unitized design installs easily with a yoke bolt/nut and install tool.
- Press-fit OD incorporates an integral wear ring for optimal lip contact, eliminating yoke wear and repair sleeves that shorten seal life.
- Sealing lips are insulated from yoke contact for longer life.
- Labyrinth sealing path with multiple dust lips keeps contamination out, extending seal life.

Unitized Pinion Seal

Higher shaft speeds and increased torque demand a seal that can withstand higher temperatures. RevHD® heavy duty pinion seals are designed for these conditions. The unitized design eliminates contact between the yoke surface and the seal lip. New yokes will remain new at the sealing point.

Available for a variety of different applications. Meets or exceeds OE material recommendations.

Conventional Pinion Seals also available.

Marathon

BRAKE SYSTEMS

KVT Vocational Dependable. Tough. Proven.

Marathon developed KVT brake linings to handle the high heat and heavy-duty demands of refuse, concrete, logging, sand and gravel, oil delivery, beverage transport and other tough applications. KVT is a premium, organic material rated for 25,000 lb axle loads that provides stopping power you can count on with a long service life. This versatile lining meets Federal regulations in accordance with FMVSS 121 test procedure for applications up to 25,000 lbs.

KVT linings feature the Hi-Density Marathon formulation (detailed at right) that will improve your bottom line through better performance and fewer maintenance headaches.

KVT Delivers

- Ideal for high heat, severe duty applications
- Longest lining life in its class
- Hi-Density formulation for excellent heat dissipation
- Dependable stopping performance
- Excellent brake fade and recovery characteristics
- Extremely drum friendly

Hi-Density Friction

One of the most significant design characteristics of any heavy duty brake lining is its density. When higher quality and heavier raw materials are used in a lining's formulation, it creates a higher mass in the block or stated another way, higher density. Truck brakes are designed to convert the energy of a moving vehicle into heat energy. A higher density increases the lining's ability to efficiently handle heat, and is the most critical component in a friction material's fade, recovery and wear.

- Higher density friction materials have the ability to hold more heat energy and therefore more efficiently dissipate the heat
- Higher density friction materials have stronger structural integrity, making them less likely to crack in service, while riveting or due to rust jacking
- Higher density linings exhibit significantly better wear characteristics, especially at higher temperatures
- Higher density friction materials are more resistant to brake fade and water fade
